A chi di dovere.

Vi prego di trovare qui annesso il mio CV.

Ne garantisco la correttezza, e autorizzo l'uso previsto dalla legge delle infomazioni qui contenute.

In fede.

Elio Riboli, MD, MPH, ScM, HonFPH, FMedSci

Professor of Cancer Epidemiology and Prevention,
School of Public Health,
Imperial College London

Medical and Scientific Adviser, WCRF International,
Co-Chair, WCRF Scientific Executive Committee

CURRICULUM VITAE

ELIO RIBOLI

MD, MPH, MSc, Hon FPH, FMedSc

Professor in Cancer Epidemiology and Prevention
School of Public Health, Imperial College London

Contact Details

Name: Elio Riboli

Email:

Research and Professional
Synopsis

My professional carrier has developed at the international level in the field of cancer and non-communicable disease epidemiology and prevention.

Firstly, at the Epidemiology Department of the National Institute of Cancer, Milan (1978-1983) where I conducted epidemiological studies on the role of alcohol, tobacco, and occupational exposure in the aetiology of cancers of the head and neck and lung. In parallel I contributed to the

establishment of Lombardy Cancer Registry, that became the first IARC-WHO (International Agency for Research on Cancer of the World Health Organisation), accredited population-based cancer registry in Italy. During this period, I also spent one year at the Harvard School of Public Health as an IARC-WHO fellow and MSc student.

In 1983 I was appointed Medical Officer in Epidemiology at IARC-WHO, based in Lyon, France. While at IARC, I engaged in the mid 1980's into a novel area of research focusing on the role in the cancer causation of diet, nutrition and endogenous hormones and became the first Head of the newly established IARC Nutrition and Cancer Programme. These research activities led to the identification of the scientific need of establishing very large population based longitudinal cohorts, with biobanks, designed to better investigate and understand the role of nutritional, behavioural and metabolic factors in the aetiology of cancer and other common chronic diseases. This line of research materialised in the initiation in 1988 of the pilot phase of European Prospective Investigation into Cancer and Nutrition (EPIC), and its subsequent funding by the Europe Against Cancer programme of the European Commission from 1990 onward. I have since been the European Coordinator and Principal Investigator of EPIC.

EPIC is a prospective cohort study that includes 521,000 participating volunteers, in 24 collaborating centres in 10 European Countries. In EPIC, detailed questionnaire data on diet, lifestyle, personal history and health, standardised anthropometric measurements collecte at baseline and in subsequent follow-up occasions. Alson, at baseline, blood samples were drawn from participants and separated in serum, plasma, DNA and erythrocytes, aliquoted in 28 plastic straws and stored in liquid nitrogen for future studies. The EPIC biorepository was the first biobank of this size (about 9 million samples) based on a prospective cohort study ever established in the world, Over the past 25 years EPIC has attracted over 120 Million Euro in research funding from

the EC and a variety of National funding agencies (mainly from Europe and USA), Charities and private donors. These funds have been supporting many research projects that have produced over 1,000s scientific publications, many in high impact journals.

The research I have led within EPIC has contributed to the discovery of the role in cancer causation of metabolic factors such as obesity, insulin resistance and other components of the "metabolic syndrome". Some of these factors were thought to be specific of cardiovascular diseases and diabetes. The discovery that these conditions are common risk factors to diverse chronic diseases has provided additional scientific evidence for informing prevention strategies of non-communicable diseases (NCDs) at the population level. These results have also translated in worldwide public health guidance by international bodies and health charities such as WHO and the World Cancer Research Fund.

While working at IARC, I was appointed Adjunct Professor, Department of Environmental Medicine, at New York University (from 1990 until 2019) and Senior Visiting Scientist at the Division of Cancer Epidemiology and Prevention of the National Institute of Cancer-NIH. At NYU I collaborated in research in nutrition, metabolism and cancer based on the NYU Women Health Study, a prospective cohort study that had preceded a few years the start of EPIC. We reported for the first time from a prospective cohort the association between insulin resistance, measured by C-peptide, and colorectal cancer risk. In 2004 I was among the funders of the NCI Cohort Consortium initiative (https://epi.grants.cancer.gov/cohort-consortium/) that has grown to currently include more than 50 cohorts in more than 15 countries. I have been a member of the Cohort Consortium Steering Committee for a number of years and I was its Chair in 2014-2015.

In 2006 I moved from IARC to Imperial College where I was initially appointed Professor and Chair in Cancer Epidemiology and Prevention and one year later Head of the Division of Epidemiology, Public Health and Primary Care (DEPHPC).

Under my direction, the Division increased substantially the research volume, the national and international research activities as well as its educational portfolio. In recognition of the increased size, scope and success of the Department, i n 2 0 1 9 Imperial College decided in liaison with National Health Authorities to establish the first Imperial College School of Public Health (SPH (https://www.imperial.ac.uk/school-public-health). I was appointed the funding Director of the School. In 2008 the former DEPHPC was ranked second best among UK academic institutions in Epidemiology and Public Health by the UK Government Research Assessment Exercise (RAE 2018). This leading position was confirmed by the 2014 results of the subsequent Research Evaluation Frame Work (successor of the RAE), when Imperial College SPH was ranked among the two top UK academic institutions in Epidemiology, Public Health and Health Services. In the most recent 2022 RAE, the SPH was ranked first nationally in the field of Epidemiology and Public Health.

In 2008, following the establishment by the UK Department of Health (DH) and National Institute of Health Research (NIHR) of the Imperial Academic Health Science Centre, I was appointed Director of the new Public Health Clinical Programme of the Imperial College Healthcare NHS Trust (ICHNHS). Under my leadership, the Programme established several innovative public health services, such as two GP-led urgent care centres in west London that effectively and efficiently reduced the burden of Acute and Emergency services and provided patients with a more appropriate and stable link with Community Health services. I also led the development of new programmes aimed to improve Patient Experience and Public and Patient Involvement and translational research on the effectiveness of programmes on smoking cessation and health promotion. I was subsequently appointed Director of Research in Public Health of the Imperial College NHS Healthcare Trust, and Chair of Translational Public Health Medicine of the Imperial AHSC (2012-2016) and leader of the Public Health Theme (2012-2016) in the Imperial College Biomedical Research Centre, supported by the UK Government National Institute of Health Research.

From 2008 until 2016 I have co-directed the design, establishment and operational implementation of the Qatar Biobank, a population based prospective study aimed at the investion of the causes of chronic disease icommon n the local population, namely obesity, diabetes, coronary heart diseases, asthma, and other respiratory diseases. The project was funded by the Qatar Foundation. Qatar Biobank stands out among other similar projects as it was the first population cohort and biobank with an extensive baseline clinical phenotyping of participants that includes various clinical measurements of cardiometabolic and respiratory function, imaging (total boby iDXA, 3D carotid ultrasounds and retinal imaging), anthropometry, physical strengths and cardiometabolic fitness. In addition, detailed personal information on health and lifestyle are collected by questionnaire and biological samples of blood, urine and saliva are collected and stored for medical research purposes. The Qatar Biobank programme, after having recruited the first 4,000 participants under the supersion of the Imperial College team, moved ahead to progressively achieve the target of 50,000 study participants.

Between January 2014 and June 2015, I was the Chair of the Executive Committee of the InnoLife Consortium that brought together 144 partners from European Universities, Industries and Health Services. In December 2014 InnoLife was successfully awarded by the EC to become the new Health Programme of the European Institute of Education, Innovation and Technology (EIT Health). EIT-Health is a public-private partnership that represents a total investment in education, innovation and business creation of 2.1 Billion Euro. I am currently member of the newly established EIT-Health European Supervisory Board.

In 2015-2016, in collaboration with the International Agency for Research on Cancer, I initiated the establishment of the European Cohort Consortium (ECC), which regrouped over 20 large Europen population cohorts, totaling more than 2.5 million study participants. I organized the first EEC meeting at Imperial College London, and I have co-led the development of joint proposals aimed at investigating behavioural, environmental, metabolic and genetic risk factors of cancer and other NCDs.

Since 2016 I hold a Visiting Professor position at Lee Kong Chian School of Medicine, NTU, in Singapore,(http://research.ntu.edu.sg/expertise/academicprofile/Pages/StaffProfile.aspx?ST_EMAILID=ELIO.RIBOLI), where I have been collaborating to the design and the implementation of the HELIOS project, a new prospective cohort study aimed at investigating risk factors of diabetes, cardiovascular and other chronic diseases in the multi ethnic population of Singapore.
http://www.lkcmedicine.ntu.edu.sg/Research/Pages/HELIOS.aspx

The HELIOS project has provided the bases for the funding of a larger prospective cohorts named SG100K. This is a comprehensive population health study of 100,000 Singaporeans to identify social, environmental, lifestyle and genetic factors associated with diseases prevalent in Singapore, such as diabetes, hypertension, and cancer. It is a multi-institutional effort seeking to identify new ways of preventing diseases, and unravel clues that will further the population's health wellbeing. https://www.ntu.edu.sg/helios , https://www.ntu.edu.sg/helios/our-people

In 2017 I was appointed Professor of Public Health at Humanitas University in Milan, Italy, where I held a part-time professorial position until September 2023.
https://www.hunimed.eu/professors-researchers-fellows/elio-_riboli/.

In January 2021, I was appointed Director of the Cancer Epidemiology and Prevention Research Unit, and I led its establishment jointly between Imperial College and the Institute for Cancer Research

https://www.imperial.ac.uk/medicine/cancer-epidemiology-and-prevention-research-unit/
https://www.icr.ac.uk/our-research/centres-and-collaborations/strategic-collaborations/the-cancer-epidemiology-and-prevention-research-unit-(cepru)

In 2024, I was appointed Medical and Scientific Adviser of the World Cancer Research Fund International, a large international charity organization that has been supporting research on diet, metabolism, lifestyle and cancer since 1990, based in UK, USA and the Netherlands.

I have co-authored over 1,182 peer-reviewed publications, of which over 900 based on EPIC. I have contributed to over 100 book chapters and 3 books. I have served on editorial boards of major journals on nutrition, cancer, epidemiology, and medicine and on national and international committees addressing health policy in relation to cancer epidemiology, cancer prevention, nutrition and behavioural and environmental factors.

Academic Positions at Imperial College London and Humanitas University

2005 – Chair in Cancer Epidemiology and Prevention, Department of Epidemiology and Biostatistics, Imperial College London

2008 – 2017 Director, School of Public Health, Imperial College London

2008 – 2017 Member of the Board of the Imperial College Faculty of Medicine

2011 – 2016 Member of the Imperial College Senate as representative of the Faculty of Medicine.

2011– 2020 Director of Research, Public Health Clinical Programme Group, Imperial College Healthcare NHS Trust

2021-2023 Director, Cancer Epidemiology and Prevention Research Unit, joint bweteen Imperial College and the Institute of Cancer Research.

Concurrent Academic positions.

2017- 2023 Professor in Hygiene and Public Health, Humanitas University, Milan (Part-time position)

2016-2026 Visiting Professor, Lee Kong Chian School of Medicine, Nanyang Technological University, Singapore

Previous Professional Appointments

1994-2005 Chief, Unit of Nutrition, Hormones and Cancer, IARC-WHO

1991-1994 Head, Programme of Nutrition and Cancer, IARC-WHO

1983-1991 Senior Epidemiologist, Unit of Analytical Epidemiology, International Agency for Research on Cancer, IARC-WHO

1986-2019 Adjunct Professor of Epidemiology, New York University Medical Centre

1978-1983 Senior Researcher (equivalent to Clinical Senior Lecturer), Department of Epidemiology, National Cancer Institute of Italy (Milan)

Education

1981-1982 Master of Science (MSc) in Epidemiology, Harvard School of Public Health
1978-1980 Master in Public Health (MPH), Postgraduate School of Hygiene and Public Health, Milan University
1971-1977 Doctor in Medicine and Surgery, Maxima cum Laude, Milan University Medical School
1966-1971 Bachelor of Science, Scientific Lyceum Vittorio Veneto, Milan

Medical Boards

2009	Fellow Academy of Medical Sciences, UK
2008	Honorary Fellow of the Faculty of Public Health of the Royal College of Physicians, UK
2005	Registered Physician, licensed to practice medicine, General Medical Council, UK
1980	Specialist in Public Health, Italy
1978	Member of the Italian Medical Association, Italy
1978	Licensed to practice medicine, Italy

Appointment to national and international scientific bodies (selection)

2024-	World Cancer Research Fund's Medical and Scientific Adviser, Chair the Executive Scientific Committee. https://www.imperial.ac.uk/news/254540/professor-elio-riboli-appointed-cancer-charity/ https://www.wcrf.org/about-us/news-and-blogs/we-inaugurate-science-executive-committee/
2017-	Co-Principal Investigator of the HELIOS (Health for Life in Singapore) and SG100K programmes, LKC-NTU, Singapore
2014- 2015	Chair, NIH-NCI Cohort Consortium Steering Committee
2015-	Chair, International Advisory Board, Humanitas University, Milan , Italy
2015-	Member, Supervisory Board of the EIT-Health programme of the European Institute of Innovation and Technology of the EU
2014-2015	Chair, InnoLife Consortium on Healthy Living and Active Ageing
2008-	Member of the Scientific Advisory Board of the AICR-WCRF
2004-2009	Member of the Scientific Panel and Advisory Committee of the second edition of AICR-WCRF report on nutrition and cancer
2002-2003	Member of the Scientific Council of the AFSSA, "Agence Française de Sécurité Sanitaire des Aliments" (French Agency for Food Health & Safety),
1999-2002	Member of the Scientific Council of the InVS, "Institut national de Veille Sanitaire" (National Institute of Health Surveillence of France), by joint appointed of the Ministries of Health and Social Affairs
1998-2003	Chair, Scientific Grant Review Panel, World Cancer Research Fund, London
1998-2000	International Advisory Board, American Institute for Cancer Research, Washington
1995-2005	Chair, Surveillance and Safety Committee of the SUVIMAX intervention trial on antioxidants and prevention of cancer and cardiovascular disease, Paris
1993-1997	Chair, Committee on Nutrition and Cancer, Comité National d'Etudes et de Recommandations sur la Nutrition et l'Alimentation (CNERNA), under the authority of the CNRS (National Scientific Research Council), Paris, France
1993-1997:	Member, expert group on diet and cancers convened by the Committee on Medical aspects of Food Policy (COMA) of the UK Department of Health, London
1990-1998:	Member: Committee on Cancer Prevention and Epidemiology, Europe Against Cancer Programme, European Commission
1990 –	Chair, Steering Committee of the European Prospective Investigation into Cancer and Nutrition (EPIC)

Completed research support (selection of recent grants)

P.I. Centre of Excellence in Proteomics and Cancer Research, based at Imperial College. Proteomics based research of early detection markers and long-term markers of cancer.
Funder: SomaLogic Limited, Boulder, Co, USA
Amount: £1,300,000
Duration: 2021-2025

Co-I DISCERN, Identify the causes of three poorly understood cancers in Europe – renal, pancreatic, and colorectal cancers. funded by Horizon Programme

PI: Establishment of phase 1 of the Singapore predicting and preventing population health study (now HELIOS)
Funder: LKC School of Medicine-NTU
Amount: £474,000
Duration: 2017-2022

PI- Qatar Biobank extension for NCDs epidemiology
Funder: Qatar Foundation
Amount: £2,340,000
Duration: 2014-2019

Co-I- Istitutional Support Strategic Fund
Funder name: Wellcome Trust
Duration 2016-2019

Co-PI: BBMRI-LPC: Refinement of Clinical Endpoints in European Prospective Cohort Studies.
Funder: EU FP7: CP&CSA, GA No: 313010
Amount: €460,485
Duration: 2013 – 2017

PI- Cancer Epidemiology and Prevention
Funder: Utrecth University
Amount Euro 164,000
Duration; 2013-2017

PI: OGAPEF: Obesity and gastrointestinal adenocarcinomas: the independent and joint roles of dietary phytoestrogens and fibres.
Funder: EU FP7: Mare Curie Intra European Fellowship PIEF-GA-2012-328330
Amount: €231,283
Duration: 2013 - 2015

PI: Qatar Biobank design and establishment
Funder: Qatar Foundation
Amount: £26,460,000
Duration: 2010 – 2016

Co-PI: EPIC-CVD Individualised CVD risk assessment: tailoring targeted and cost-effective approaches to Europe's diverse populations
Funder: EU FP7: Collaborative Project, GA No: 279233
Amount: €196,416
Duration: 2012 - 2015

Co-PI: EPIC-HEART: Study of the interplay in genetic, biochemical and lifestyle factors on coronary heart disease incidence.
Funder: UK Medical Research Council / British Heart Foundation
Amount: £651,021
Duration: 2010 - 2014

PI: BPC3 - Breast and Prostate Cancer Cohort Consortium
Funder: National Cancer Institute
Amount: Phase 1 - US$4,925,341
Duration: 2004 - 2008
Amount: Phase 2 - US$4,600,500+ supplemental grant Pancreatic Cancer US$295,000
Duration: 2008 - 2013

PI: EPIC-RA: Towards the prevention of rheumatoid arthritis
Funder: Imperial College Healthcare Biomedical Research Centre
Amount: £255,513
Duration: 2010 - 2012

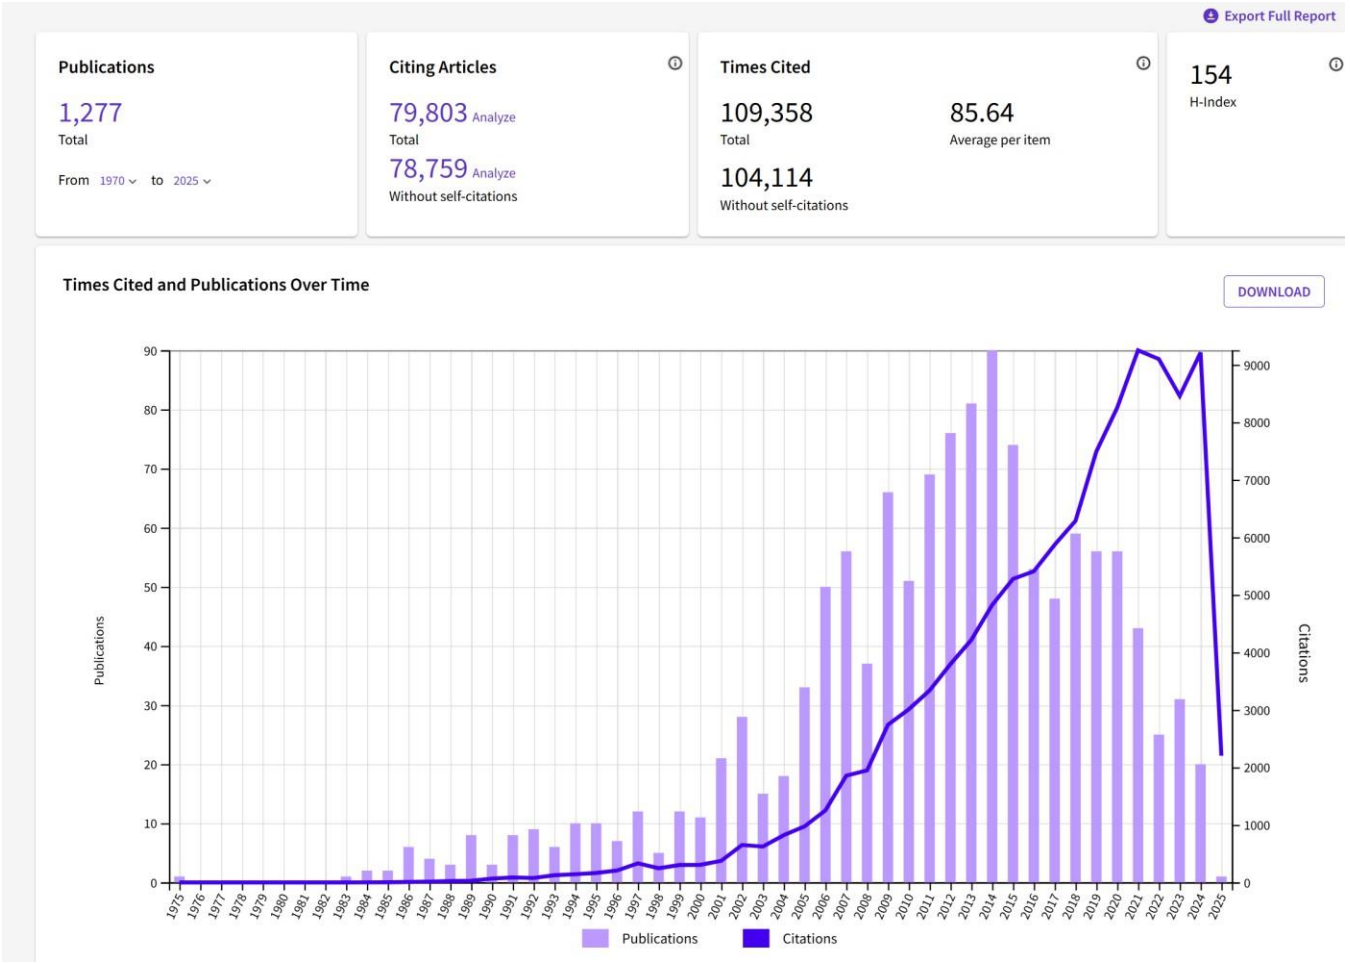

Co-PI: PANACEA: Physical activity, nutrition, alcohol, cessation of smoking, eating out of home and obesity
Funder: EU DG SANCO, GA No: 2005328
Amount: £106,331
Duration: 2007 - 2012

Co-PI: EPIC-InterAct: Investigating how our genes and lifestyle interact to lead to diabetes
Funder: UK Medical Research Council
Amount: €250,000
Duration: 2006 - 2011

PI: EPIC: European Prospective Investigation into Cancer and Nutrition
Funder: EU FP5: Coordination Action: GA No.006438
Amount: €1,000,000
Duration: 2005 - 2009
